Office Action Summary	Application No. 09/779,831	Applicant(s) BALTHASER, NEIL	
	Examiner Sanjiv D. Shah	Art Unit 2176	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-62, 79-125, drawn to a method for designing, creating and maintaining a rich-media application, classified in class 715, subclass 500.1.
 - II. Claims 63-78, 128-145, drawn to a method for providing host website for creating rich-media application, classified in class 715, subclass 513.
 - III. Claims 126-127, drawn to method for displaying rich-media application, classified in class 715, subclass 526.
 - IV. Claims 146-154, drawn to a business method for designing and creating rich-media application, classified in class 715, subclass 500.
 - V. Claims 155-166, drawn to a system for executing rich-media application, classified in class 715, subclass 501.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I & II, I & III, I & V, II & III, II & IV, II & IV, III & IV, III & V and IV and V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as designing the rich-media application. Invention II has separate utility of providing host website to media content. Invention III has a separate utility of displaying rich-media. Invention IV

Art Unit: 2176

has a separate utility of business aspect of design such as cost. Invention V has a separate utility of executing media content on a processor. See MPEP § 806.05(d).

3. Inventions I and IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the subcombination requires business aspect of designing such as considering cost and fees, whereas combination only requires design factor. The subcombination has separate utility such as estimating the cost of project.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, III, IV or V, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
